

Perfection in Rhinoplasty

NOLST TRENITÉ Surgery Set

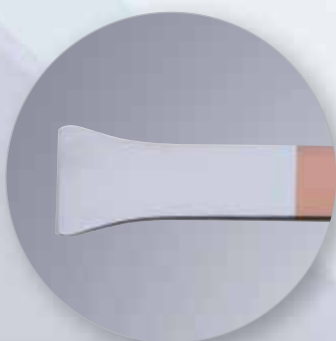

STORZ
KARL STORZ — ENDOSKOPE

THE DIAMOND STANDARD

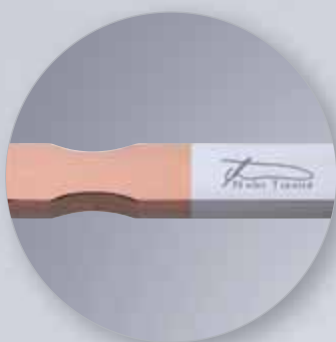

In modern Rhinoplasty, trauma reducing procedures are of utmost importance to achieve good long-term results. Basic philosophy in Rhinoplasty is to use the least traumatic approach in which the surgeon is able to achieve the desired result. With this renewed, more extensive and special ergonomic Rhinoplasty Set, designed by Professor G. J. Nolst Trenité, the surgeon can achieve better results. With these high quality instruments with their exclusive to KARL STORZ gold brown finish, there can be less surgical trauma, resulting in less postoperative ecchymosis and oedema. Also hematomas and the development of scar tissue will be reduced when the surgeon uses contemporary surgical techniques.

Gilbert J. Nolst Trenité, MD PhD
Professor in Otorhinolaryngology
Past President of the European
Academy of Facial Plastic Surgery

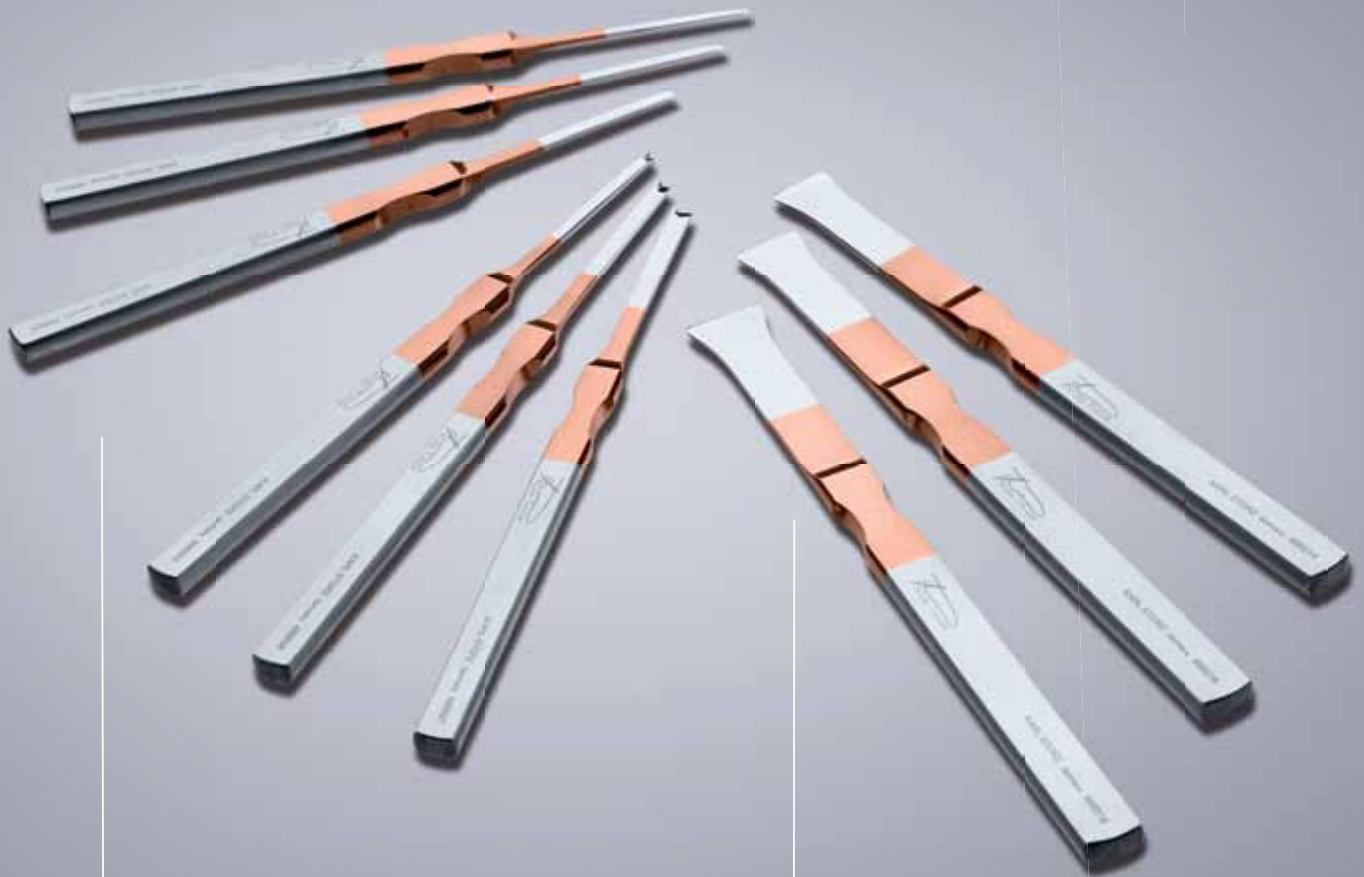

The Instruments are manufactured with high quality material - built to the quality standards of KARL STORZ.

The exclusive KARL STORZ recognition features of the Prof. Nolst Trenité Rhinoplasty Instruments are the gold brown finish as well as the personal signature of Prof. Nolst Trenité.

The Instrument Set includes a large variety of different Micro Osteotomes.

These Osteotomes are specifically designed for removal of nasal humps. Due to the round corners on the distal end, tissue will not be damaged, while the orientation of the surgeon is still guaranteed.

The complete Rhinoplasty Set consists of additional general instruments. To get more information about the complete Set please refer to the corresponding ENDOWORLD®.
